

Graded Assignment

Weekly Budget 1 (20 points)

In this assignment, you will build on the example constructed during this section. Open the weekly budget spreadsheet you created, and save this document as `Weekly_Budget_1_Your_Name`.

You've decided to combine the weekly budgets of your family into a single spreadsheet. This requires that you add new columns to your spreadsheet.

First, you need to rename the column "Amount" with the name of one family member. Then, you need to add a column for each other family member. You should have at least four family members on your spreadsheet. If you do not have four family members, you can make up names to put in the other columns.

Then, add 10 budget items you and your family members have each month. Next, add values for each family member—feel free to be creative. If a family member does not spend money on one or more of the items, you can leave them blank. Every budget item should have a value for at least one family member. Some budget items should have values for multiple family members.

Your budget should look similar to the sample below. Rename Expenses 6 -10 to the expenses you choose.

	A	B	C	D	E
1	Weekly Budget				
2					
3	Expense	Mom	Dad	Jane	Matt
4	Movies				
5	Eating Out				
6	School Supplies				
7	Clothes				
8	Savings				
9	Expense 6				
10	Expense 7				
11	Expense 8				
12	Expense 9				
13	Expense 10				
14					

Submit your spreadsheet, making sure it meets the guidelines below.

	Points Possible	Points Earned
Header row in row 3 contains at least four family members and the title Expenses.	4	
At least 10 budget items have been entered.	4	
At least one budget item has values for multiple family members.	6	
All family members columns are the same size and no columns are sized to obscure text.	6	
Total Points	20
